ABOUT ME

I am a Frontend Developer with **3 years of hands-on experience**, specializing in React, TypeScript, Redux, React-Query, HTML and CSS.

- Contributed to the inner **UI-kit** while working on a large **product** within an international team
- Developed projects **from scratch**
- Served as a **team lead** at an international **hackathon**, where we created a map of sustainable future, known as Kartevonmorgen
- Initiated **2 tech meet-ups** ("Profiling & optimisation of web applications", "Redux Toolkit vs Redux")

In the near future I plan to dive into Three.js, UX, Animations and Micro Interactions to become a **Creative Developer**. I would love to collaborate closely with designers in crafting inspiring and user-friendly interfaces.

WORK EXPERIENCE

Lomray Software
Frontend Developer

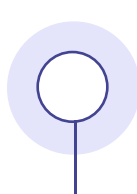

January 2021 — Present

- Projects:** Education Platform, Admin panel for autonomous trucking company, Event management app
- Responsibilities:**
- Contributing to the development of frontend infrastructure and architecture, including state management, design patterns and reusable components.
 - Writing clean, maintainable, and modular code, adhering to coding standards and best practices.
 - Collaborating with UX/UI designers, Business Analysts, QA engineers, Product and Project Managers.
 - Pro-actively proposing technical and business solutions.
 - Actively participating in knowledge-sharing activities.
 - Using Scrum methodology.
- Results and achievements:**
- Successfully released 3 micro-frontends within the Education Platform project, reaching over 1,000,000 users. This achievement was made possible through dedicated teamwork, productive brainstorming and adherence to project deadlines.
 - Translated customer requirements into a functional project over a period of 4 months, through open dialogue, taking on the roles of both a business analyst and designer when needed.
 - Maintained a track record of receiving 100% positive feedback from customers over a span of 3 years, skillfully balancing customer requirements with development capabilities.
 - Participated in knowledge-sharing activities, served as a speaker at 2 internal technical meetups, led a team at 1 international hackathon. Additionally, I volunteered as a mentor for 5 individuals and effectively guided them through a learning course.

Tech stack:

React, TypeScript, Redux, Redux-Saga, React-Query, HTML, CSS (SCSS, LESS, Tailwind, Styled Components, AntDesign), REST API, React Hooks, Webpack, ESLint, Prettier, Git (Github, GitLab), Scrum, Jira, Trello, Figma, Canva, Miro.

VOLUNTEERING 🙌

The Rolling Scopes School
Mentor for Frontend Developers

June — December 2023

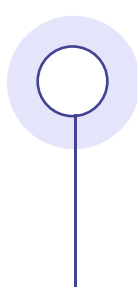

Responsibilities:

- Sharing knowledge about code best practices
- Performing code reviews
- Conducting interviews
- Creating individualized roadmaps for each student

Results and achievements:

- Facilitated the success of 5 students, guiding them to accomplish their goals and complete the course
- Reviewed more than 50 Pull Requests, offering constructive feedback
- Conducted 15 interviews and developed individualized roadmaps for students to progress in Frontend Development

EDUCATION 🎓

Minsk State Linguistic University
Computer linguistics specialist, English language teacher

2017
