VIKTORYIA BAKUN

Frontend developer (React)

ABOUT ME

I'm a result oriented frontend developer with experience in creating Landing Pages and SPA, using React(JS/TS), Redux, HTML & CSS. After working as a freelancer, I would like to find a project work/full-time job in a creative company with up-to-date tasks and collaborative team! I'm keen on solving katas on codewars and watching IT-conferences. One day I will become not just a viewer but a public speaker!

WORK EXPERIENCE

Frontend Developer
FREELANCE [2020 - PRESENT]

Migration from JavaScript to TypeScript
Integration and use of Formik (+ validation)
Custom components development
Registration and login form creation
Working with API
Creating unit-tests
Refactoring, Bug fixing

English teacher
SELF-EMPLOYED [2018-2020]

Working with children
Developing creative curricula
Using interactive resources (Quizlet, learnenglishteens)
Personalization of studying process
Communicative approach
Homework control

EDUCATION (RELEVANT)

IT -INCUBATOR [2020]
